C3000 Damp Location Listing and End of Lamp Life Compatibility

Chloride is pleased to announce a product enhancement to our C3000 emergency ballast. Due to an increase in demand to operate the C3000 with AC ballast products that employ end of lamp life detection, Chloride has upgraded to our C3000T series. The C3000T series is fully compatible with traditional and end of lamp life detection AC ballast products. To further enhance your ability to meet demanding job requirements, we are also including an optional damp location listing with the product.

Please be aware that this change is effective immediately and any orders received as C3000 will be changed in-house to our new C3000T series. As always, should you have any questions please feel free to contact us directly. Thank you for your continued support.
