## Product Bulletin

### **CMF Steel Series Emergency Lighting Offering Reduced - Effective July 3<sup>rd</sup>, 2008**

Ongoing product offering rationalization has revealed the need to discontinue our CMF125 product line in all configurations. This discontinuation only affects our 6 VDC 125-watt steel product. Historical and YTD sales of the CMF125 family do not warrant continued manufacturing support of these products. Please be aware that all of our other product configurations in our CMF/TMF family are still available.

#### **ALL OTHER CMF/TMF PRODUCTS REMAIN UNCHANGED**

If you happen to get a request for high-wattage steel product in a 6 VDC emergency operation you should make every effort to convert the order into a 12 VDC TMF product. Please find the enclosed, revised specification sheet and price sheet for the CMF/TMF Series for your records. As always, should you have questions or concerns regarding this matter do not hesitate to contact us directly. Thank you for your continued support.
