## New Product Announcement!

# *PathMaster Composite LED Bollard*

**December 31, 2007** - Chloride introduces the PathMaster Composite LED Bollard, an outdoor architectural fixture designed to provide energy-efficient illumination of walkways, decks, sidewalks, and landscape areas for normal and emergency use. Incorporating LED technology, each light engine utilizes three high-performance, long-life, low-maintenance white LEDs for illumination and can be applied from one to all four sides of the bollard to maximize path of egress as needed. The bollard can be readily affixed by an anchor base, lag bolts, or direct burial. The PathMaster Power System provides normal and emergency power support.

The PathMaster Composite LED Bollard is fabricated from fiberglass-reinforced polymers. All exposed hardware is stainless steel and the light engines are constructed of die cast aluminum. Standard finishes include black, bronze, and white. Custom finishes are also available. The PathMaster Composite LED Bollard is ETL listed to UL 1598 and 1838 standards.

Chloride is a leading manufacturer of commercial and industrial emergency lighting, exit signs, and AC emergency lighting systems. Chloride is a Genlyte company, distributes its products worldwide, and is on the web at [www.chloridesys.com](http://www.chloridesys.com).

Thank you for your continued support!

*Remember to keep **Chloride** in mind for all of your emergency lighting needs!*
