New Product Announcement!

Rhyno Series

October 8, 2007 - Chloride proudly introduces the newest addition to our lighting family, the Rhyno Series, which is designed for industrial and harsh environment emergency lighting needs. Following the tradition of superior product design and manufacturing, Chloride once again raises the standard for industrial emergency products. A 120/277 dual voltage input with surge protection and Intelli-Charge for self-diagnostics allows the Rhyno Series to serve as an emergency lighting unit with the most reliable charging system available on the market. Standard Intelli-Charge self-diagnostics continuously monitors all critical functions of the Rhyno Series and the self-testing option satisfies the monthly periodic testing requirements in NFPA 101 and the IBC. The Rhyno Series is available in 6, 12, and 24 volt, 25 to 100 watts.

The Rhyno Series is designed to be protected against liquid, moisture, dirt, and dust entry. The Rhyno Series has been third-party tested for NEMA 4x and IP66 areas, is NSF listed, and is UL listed for wet locations with cold ambient, high ambient, or extreme ambient conditions, making it ideal for warehouses, factories, paper mills, and parking decks. The housing is constructed of impact-resistant Lexan® with corrosion-resistant hardware. A one-piece, molded gasket and unexposed metallic hardware prolong product life in highly corrosive areas.

Illumination is accomplished with two lamp heads internally mounted on the bottom for optimum path of egress lighting. The lamps are held in a molded swivel assembly and are fully adjustable. The Rhyno Series is supplied standard with a wall mount bracket, but can be column, pole, or I-beam mounted with a universal mounting kit accessory. The Rhyno is supplied with a maintenance-free, sealed lead calcium, pure lead, or nickel cadmium battery for a minimum of 90 minutes of emergency power.

Chloride is a leading manufacturer of commercial and industrial emergency lighting, exit signs, and AC emergency lighting systems. Chloride is a Genlyte company, distributes its products worldwide, and is on the web at www.chloridesys.com.

*Remember to keep **Chloride** in mind for all of your emergency lighting needs!*
